

INTERNSHIP OPPORTUNITY - BUSINESS

Environmental Systems Research Institute, Inc., a privately held corporation in Redlands, California, has an internship opportunity.

About ESRI

- **Industry Leadership:** World's leader in software technology to support Geographic Information Systems—a growth industry
- **Financial Stability:** A 40-year history of continued growth and financial stability
- **Locations and Affiliations:** A main office located in Redlands, California, with 10 regional offices as well as world-wide distributors and business partners
- **Clients:** A well-established client base with world-wide federal and commercial clients in numerous industries

What We Offer

- **Work Environment:** An energetic, team-oriented work environment; staff value initiative, creativity
- **Work Setting:** The main campus is a highly functional, well-designed facility that includes a café, gymnasium, and outdoor pond
- **Compensation:** Competitive and dependent upon education and experience

Internship Description

Candidate will support key business functions in the Professional Services Division, which could include contract administration, accounting, project administration, and financial analysis. Tasks may include learning the phases and functions of managing professional services projects through the project life cycle; learning how project accounting functions relate to accounting processes such as accounts payable, accounts receivable; and learning the phases of contract administration from proposal through negotiation and contract completion.

Education and Experience

Seek a high-achieving candidate in bachelor's or master's program in Business Administration
